DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-52, drawn to a system comprising a guidewire, a filter and retraction members, classified in class 606, subclass 108 and method for using the claimed system.
- II. Claims 53-64, drawn to a system comprising a guidewire, a filter, retraction members and a retrieval catheter, classified in class 606, subclass 108 and a method of using the claimed system.
- III. Claims 65-76, drawn to a system comprising a guidewire, a filter, retraction members, a retrieval catheter and a delivery catheter, classified in class 606, subclass 108 and a method of using the claimed system.
- IV. Claims 77-126, drawn to a system comprising a guidewire, a filter, retraction members, a retrieval catheter, a delivery catheter and a balloon catheter, classified in class 606, subclass 108 and a method of using the claimed system.

The inventions are distinct, each from the other because of the following reasons: at least, the methods of using the systems I-IV are different inventions because the methods as recited in the inventions I-IV involve different sets of devices.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3731

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
